Proven Consultancy Solutions for Mobile Wireless Networks

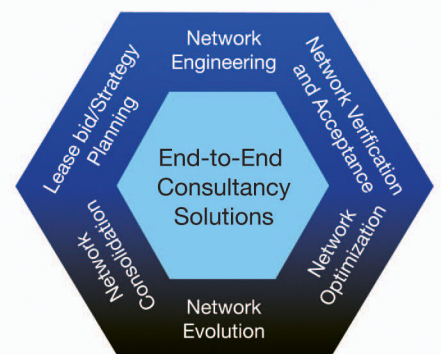

Consistel provides consultancy services in managing issues from business planning to operation of the wireless networks for the telecommunications industry.

Operators are currently facing the issues of rapid change of technologies, tighter competition, strict regulation, mounting pressure on time-to-market, multi-vendor offerings, consolidations, customer retention, etc. Consistel has all the expertise to assist operators in managing these issues and producing the results that help to create more revenue for the operator.

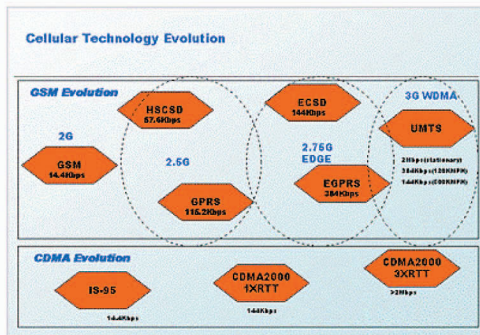

Our Proven Track Record

License bid/Strategy Planning

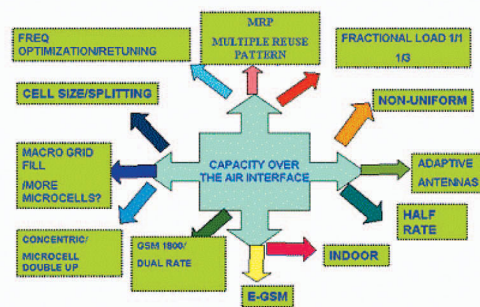

- Business planning
- Spectrum license bid preparation
- Technology selection
- RFP creation
- Vendor evaluation and selection

CONSISTEL SERVICES

Cellular Technology Evolution

Frequency Planning

Network Verification and Acceptance

- Site validation
- Acceptance Testing
- Implementation support
- Site Acquisition support and zoning

Network Engineering

- Network audits
- Model calibration
- Radio network planning
- Frequency planning
- Capacity planning

Network Evolution

- Migration to 2.5G & 3G
- Fixed Wireless Solutions (WLL / WLAN / WiMAX)
- Customer Relationship Management
- Wireless Data Solutions

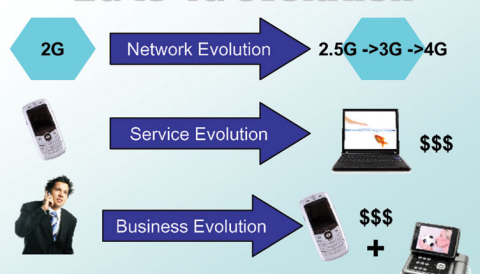

Network Optimization

- Pre-launch optimization
- Performance optimization
- Microcell planning
- Indoor coverage
- Spectrum management
- Network quality improvement

Network Consolidation

Consistel has an extensive experience in merging two different networks with multi-vendor network elements. We can assist operators to merge the networks seamlessly without any interruption to the current network. Operators thus benefit from optimizing their CAPEX and OPEX, and maximize their revenue using Consistel expertise in Network Configuration. Consistel consultants also have experience in verifying and conducting multi-vendor inter-operability testing (MVIOT).

2G to 4G evolution
